# GEN3DAO

AI Driven DAO Creator

0xAnoop x Gemini

Problem

- **Complex:** Requires deep knowledge of smart contracts and governance design.

- **Code-Intensive:** Demands expert-level Solidity development.

- **Slow:** The process from idea to deployment is long and expensive.

Solution

Visual

Design your DAO's structure on an intuitive drag-and-drop canvas.
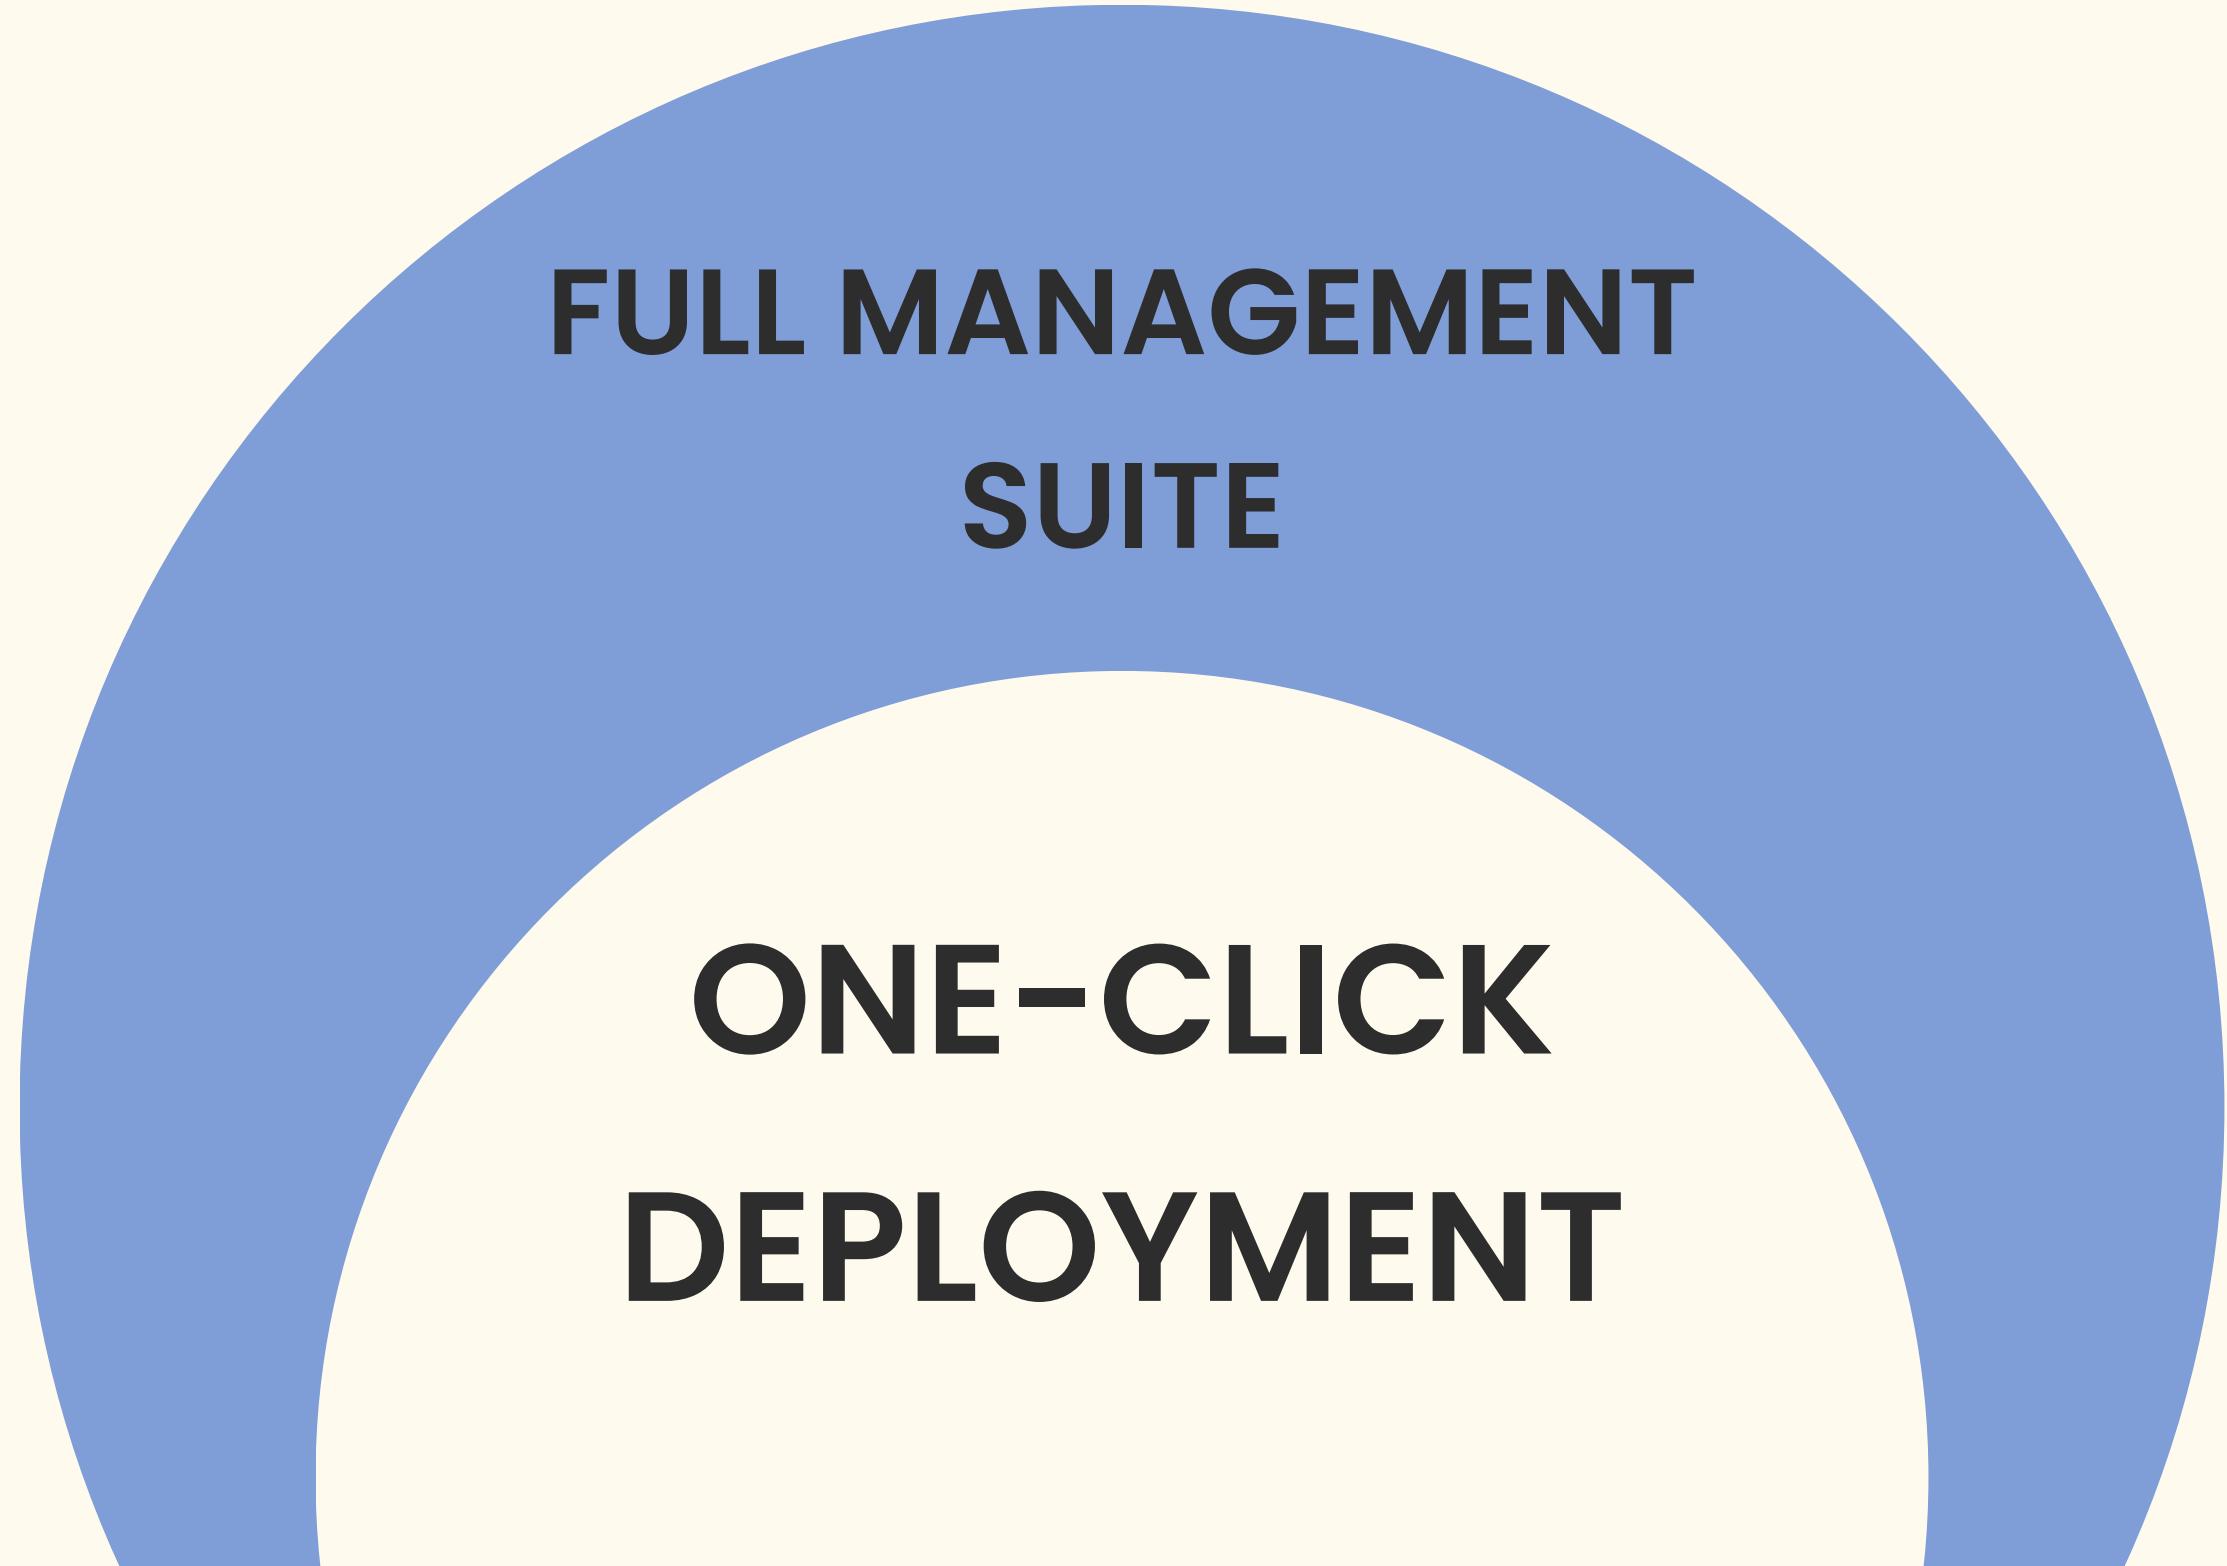

AI-Driven

Simply describe what you want, and our AI assistant builds it for you.

Zero-Knowledge Needed

No Solidity knowledge required. The AI writes the contracts.

Future Developments

FULL MANAGEMENT SUITE

ONE-CLICK DEPLOYMENT
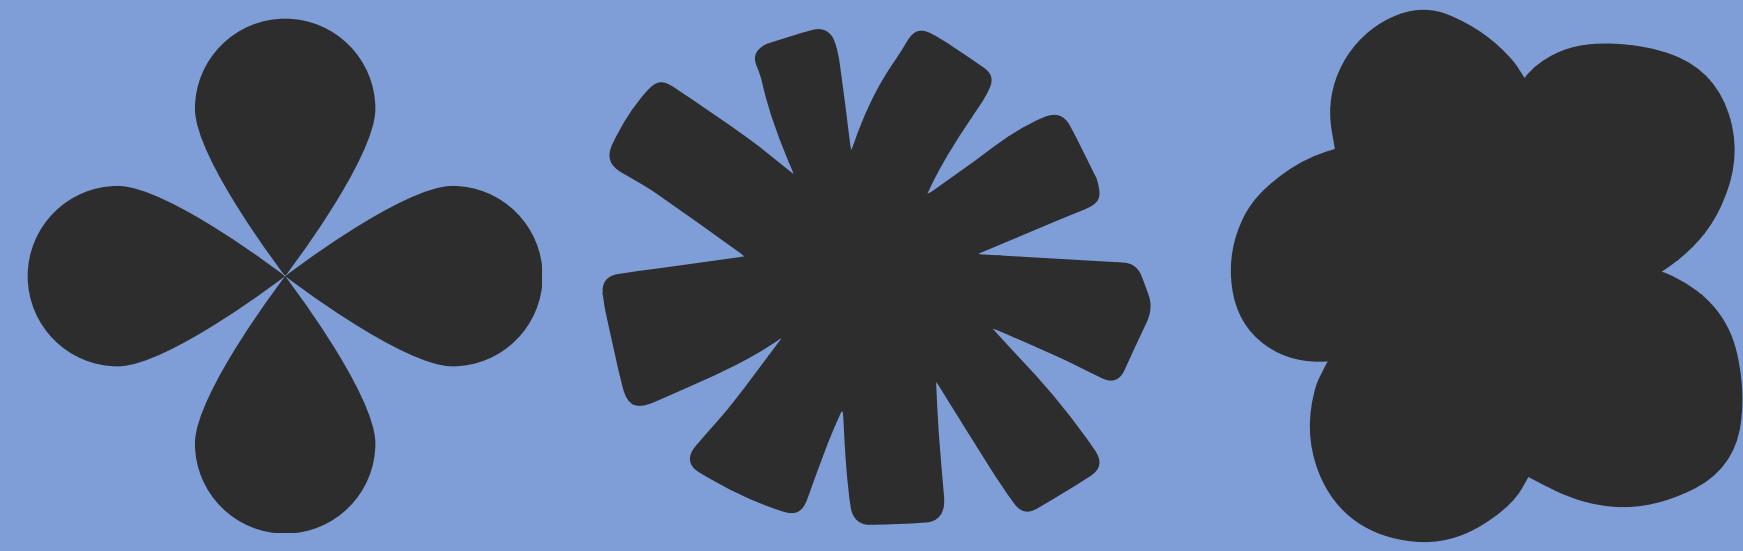

How it Works:

Design. Generate. Deploy.
- **Step 1: Design with AI**
  - Describe your DAO in plain English or drag-and-drop components.
- **Step 2: Generate Contracts**
  - With one click, our AI analyzes your design and writes complete, secure Solidity contracts.
- **Step 3: Deploy & Register**
  - Deploy your contracts and register them on-chain to bring your DAO to life. (coming soon!)

Ingoude Company

AI Powered Development

Gen3Dao isn't just a tool that uses AI; it was built entirely in collaboration with an AI coding assistant. This revolutionary approach allowed for rapid development, complex feature implementation, and a smarter, more efficient final product.

Thanks!
